SELECT TO SPEAK ACCESS:

Select to speak is a feature that allows students with hearing difficulties to make it easier for them to hear the word as well as for those with motor impairment.

\leftarrow Vision		\leftarrow Display	size		
TalkBack Provide spoken feedback for UI interactions		Set the items or Some items may	n the screen to y change posit	a size easy for y ion.	ou to see.
Message/call voice notifications Read caller info and messages out loud				2	
Font					
Display size Set items on the screen to a size easy for you to see		Gallery	Maps	Messaging	Play Store
Touch zoom Zoom in or out by triple-tapping the screen		Settings			
Window zoom Zoom in or out within a window and invert the color					
Large mouse pointer					
High contrast screen Increase screen contrast with a black background. Some screens may not change.					
Screen color inversion					
Screen color adjustment					
Monochrome		- •			+
		\Diamond	(\mathbf{C}	

DISPLAY SIZE:

This feature makes it easier to view
words/pictures/apps. The student can
choose what size the display should be
by sliding the orange dot at the bottom
of the screen back and forth to a
comfortable view.

← Message/call voice notifications Off Message/call voice notifications language

 \bigcirc

Message/ Call Voice Notifications:

- This feature allows a text-to-speech action where it will read messages, caller id, and anything surrounding those out loud. It is located under the vision tab.

BLINK LED:

- This feature is used to have a small flashing light to signal notifications and calls for hearing impaired students
