# How to practice *GREAT* cybersecurity

Be cautious of suspicious emails and links you receive

Take your CAC out of your computer any time you walk away from it

Do not write down your passwords and hide them, they will be found!

Have a strong password with special characters that is unique and memorable

Great cybersecurity starts with...

Keep sensitive information and areas on computers locked at all times

Pay attention to all of your surroundings

Be aware and watch out for insider threats

Ask your cybersecurity liaison any questions you may have visit [cease.gov](https://www.cease.gov) to learn more about cybersecurity

The graphic features a central white padlock icon surrounded by white circuit lines. The background is a dark purple with a geometric pattern of triangles and lines. There are four rectangular areas with a dotted pattern: two at the top and two at the bottom. The text "SECURITY TRAINING" is in large, bold, yellow capital letters. Below it, a dark purple button contains the text "Get it now!" in white, followed by "Learn more >>" in a smaller white font.
