What is white-collar fraud?

White collar crime is a crime that seems to go “under the radar” most of the time but is a serious problem. On the right is statistics of most white collar crimes and where they originate from.

Cybersecurity

Cybersecurity is mainly the front force of white collar crime and is used to track down and understand the crime behind white collar crime. Once cyber professionals have located and tracked down whatever crime it is then officials like FBI will take over.

Law

Law is what is originally used to infiltrate white collar crime. Once deemed unlawful by courts then that is when cyber professionals can move in. Everything starts with the local government and then works its way up.

Policy

Now even before the law can move in the policy must be sought after and if not followed then lawfull action can be taken.
