SETUP A VPN ON YOUR MOBILE DEVICE

01 SELECT A SERVICE PROVIDER

- NordVPN, ExpressVPN, and ProtonVPN are some great options but you can shop around to find what will best suit your needs.

02 DOWNLOAD THE APP AND CREATE AN ACCOUNT

- Once you've created your account and selected a plan, sign in on your device

03 EMABLE VPN IN SETTINGS

- Verify in your device settings that you have VPN enabled or have granted access so the VPN can access the network.

04 CONNECT TO A SERVER

- In the app, you'll be directed to a list of countries with available connections. Select the nearest, farthest, or whichever you like. Your exact location will be protected no matter what.

05 PLAY AROUND IN THE APP

- Try connecting to various locations; you'll be interested to see how content varies worldwide. Enjoy surfing the web in privacy!
