

# The Right to Privacy in Cyberspace

Nevaeh Wallace

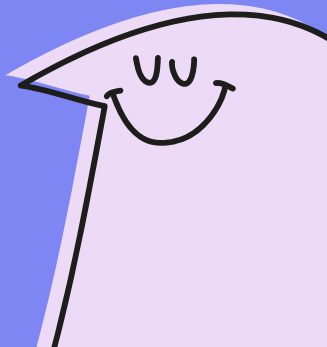

# Privacy

**"It is essential to understand that privacy is not just about hiding one's affairs from the public eye; it's about having the control and freedom to choose what information about oneself can be shared and who has the access to it. As personal lives and day-to-day activities become increasingly intertwined with digital platforms, the significance of understanding and maintaining digital privacy grows."**

12

**No one shall be subjected to arbitrary interference with his privacy, family, home or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks.**

# Digital Age

August 4th, 2022 the Office of the United Nations High Commissioner for Human Rights (OHCHR) released a report titled "The right in Privacy in the Digital Age" This report focussed on the

- The abuse of intrusive hacking tools
- the key roles of encryption in ensuring enjoyment of the right to privacy
  - the widespread of monitoring of public spaces

It draws attention to the danger of establishing widespread monitoring and control systems that might limit the growth of thriving society.

# Cybercrime Treaty

In Hanoi on Saturday, October 25, nations signed their first UN treaty addressing cyber crime, despite resistance from a surprising group of tech businesses and human rights organizations who warned of more government monitoring.

- Promote and strengthen measures to prevent and combat cybercrime more efficiently and effectively;
- Promote, facilitate and strengthen international cooperation in preventing and combating cybercrime; and
- Promote, facilitate and support technical assistance and capacity-building to prevent and combat cybercrime, in particular for the benefit of developing countries.

“Cyberspace, once envisioned as a free and equal environment, has become a mirror reflecting both the light and the shadows of humanity, where a single malicious comment or false piece of information can destroy reputations and lives.”

# Activity !!

01

Pick your  
favorite company

02

search what  
security breaches  
they have had

03

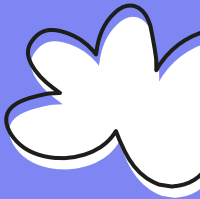

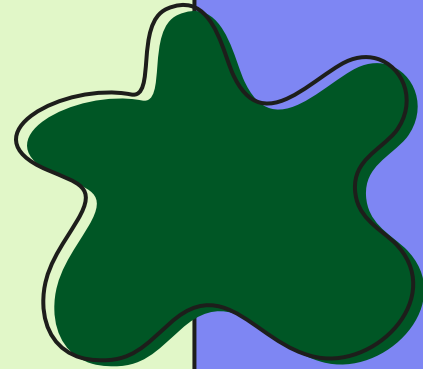

Share with the  
class
