

Review the NICE Workforce Framework. Are there certain areas that you would want to focus your career on? Explain which areas would appeal the most to you and which would appeal the least.

[Workforce Framework for Cybersecurity \(NICE Framework\) | NICCS \(cisa.gov\)](#)

In the NICE Workforce Framework, I would want my job to be a part of the Protection and Defense category. I think that the jobs that are listed in the Protection and Defense category are what my goals are more oriented toward. I've always wanted to help people and use my cybersecurity degree to help with the prevention and protection of technological systems and networks. Threat analysis appeals to me the most because it involves the identification of potential security threats and understanding their impact to mitigate them. Incident response appeals to me the least because it seems like the most boring job out of the category.
