Watch this video and think about how the career of digital forensics investigators relate to the social sciences. Write a journal entry describing what you think about the speaker's pathway to his career.

Today, I watched a fascinating talk by a digital forensics investigator. The speaker showed us insights into the field and a strange way about how he got his career. He initially trained as an accountant, but he then transitioned into IT out of curiosity and opportunity. His pivotal moment came when he joined a digital forensics team at a major accounting firm. He embraced his role though he started with limited knowledge. Digital forensics relates to the social sciences in several ways, first off investigators need to understand human behavior, ethics, and privacy, and their impact on society. Digital forensics is a prime example of how technology and social sciences intertwine to address modern challenges. The speaker often talks about the value of adapting and interdisciplinary thinking.
