

## Journal Entry Week #1

The top two areas that appealed to me are Investigation and Oversight & Governance. I picked investigation because the Digital Evidence Analysis interested me. I like the idea of being able to collect and examine the data for a cybercrime because it can be anything: logs, user activity, firewall traffic, and more. I think I would also like the Cybercrime Investigation section because of the techniques and investigative tools. I picked Governance because I'm interested in Cyber Policy. I would like to be able to evaluate what the necessary policy is to ensure good security. I'm also interested in the Cybersecurity Legal Advice because I would need to be educated in Law and Cybersecurity. The area that appealed least to me was Cyberspace Intelligence. It is a lot of responsibility and needs experience not only in cybersecurity domestically, but also internationally.
