

Some Random Script Kiddie in the Starbucks: “Let’s see what this person is up to.”

Me: “Yeah let me just turn this one can never catch a break at Starbucks.”

Explanation: People often forget that turning on a VPN will help deal with public Wi-Fi lurkers but it doesn’t mean you’re completely safe so it’s best to still have the habit of doing this.

Me: “When can this shift end no one isn’t stupid enough to attempt breaking into the server room.”

The one time I go out for a quick pee break:

Random Guy Who Broke in: “Oh hey uhh.. This is awkward.”

Explanation: Cybersecurity is a field that waits for no one as something is happening at all times so it’s best to always stay alert as one small opening can lead to someone breaching your defenses.

My Boss: "So how's the whole figuring out that one cybercriminal penetrates through our defenses?"

What I'm in the middle of dealing with:

Explanation: When working within the cybersecurity field it's best not to stress yourself out too much or it will lead to mistakes being made. Another thing to know is that breaking down assignments or tasks within the field won't be easy so make sure to take a breather ever so often to not be overwhelmed so much.
