PROFESSIONAL EXPERIENCE

UNITED STATES NAVY | VARIOUS LOCATIONS JULY 2017-MAY 2024

Team Lead & Intelligence Analyst | Navy Info Ops. Command Pacific APR 2022-May 2024

- Provided 200+ daily technical briefs and situation reports to US and allied leadership by researching, analyzing, and reporting intelligence obtained from relevant team and collateral sources which relayed developments, indications & warning, and enable preparation for future engagements and current operations in a more concise, effective product.
- Quality controlled and drafted 250+ high interest and time sensitive reports that provided near real time reporting of events and indications and warning to forward deployed forces and regional and national customers.
- Monitored and trained 6+ personnel while operating multiple electronic systems connecting a worldwide network of multi-service members and customers to include various systems throughout NSA/CSS computer networks.

Operations Supervisor & Security Manager | US Naval Vessel JUN 2018-APR 2022

- Used advanced software applications for tactical analysis, collection of valuable intelligence information, and execute operations in support of organizational initiatives.
- Led a team of 3+ personnel, overseeing the analysis of SOIs and issuance of time-sensitive reports in support of national tasking and reporting requirements.
- Demonstrated experienced-level proficiency in applying geospatial analytic techniques against metadata and content collected in order to triage and prosecute targets of interest and accurately report resulting intelligence to Intelligence Community Customers.
- Track, manage, and maintain highly sensitive security risk and/or personnel security information.
- Organized and managed the security information of personnel and ensured all personnel maintained proper accesses and clearances.
- Provide basic security analysis and risk recommendations to decision makers and customers.
