Journal Entry 5

At the end of the day, hacking is unethical and no justification for stealing would make sense but some of the motives listed by the individuals I can relate too. The one that makes the most sense is the one that was listed as entertainment, he didn't harm anyone and found a vulnerability in the system and linkedin learned and added more measures. Next would be the one listed as “multiple reasons” it discusses how hackers are motivated by ego more than anything. Next I would say the one listed as “money’ even though hackers spend their money on useless things it's not affecting anyone like the other ones listed on the slideshow. In my opinion the rest are the same level of degeneracy because it affects other parties and the hackers comeup is dependent on the demise of others
