

Here is a short example to show how my Spanish has improved. Due to my environmental learning, in the beginning none of these words would have the correct endings, and I would constantly mess up the genders of the words.

1. La profesora está delante de la clase.
2. La silla está detrás del escritorio.
3. Los cuadernos son encima de los escritorios.
4. La ventana está a la izquierda de la computadora.
5. La estudiante está lejos, de la profesora.
