

In the video, Nicole goes over the specifications of a cyber security analyst that includes skills, education, job outlook, certifications, salaries and locations. Social themes that arise in the video are responding to phishing attacks that society faces through email, text or phone calls as one of the job tasks of a cyber security analyst. Competing against IV league education and tech workers when finding a job in a big city is a social theme that concerns society specifically for those just out of college searching for a company to work for. Networking is a social theme that concerns society because when working in the cybersecurity field, meeting and working with people all around is key to success so that those people you meet can possibly give you advice on where to go when looking for a job position. Having a decent resume is another social theme that relates to anyone attempting to land a job in their degree field. Showing that you have been involved in organizations in the field or have experience and know program languages are great qualifications to have for a cybersecurity analyst.
