Using copyright imaging is a serious offense because these images are copywritten by the owner to protect their brand and people can use images for all types of things and could put the original owner or company at risk for problems they don't deserve. Bullying and trolling is a major issue in society today. The network is a place used way to often to harm someone or cause humiliation to others by way of bullying. This is especially an increased issue on social media platforms. In some instances, individuals are committing suicide and hurting others because of bullying and trolling. Collecting Information about children under 13. These children are innocent and can't defend themselves. These children can become prey to predators on the network which is a serious offense and an ongoing issue today. Using other people's internet networks can put yourself and the other person at risk for identity theft or other types of fraud. Also, it can allow hackers a chance to gain personal data to cause harm unknown to you. Faking your identify online can cause you or a person to get targeted by unwanted hackers or predators. It puts a lot of personal data at risk. Doing this illegal act can cause you to get into trouble with the law if you are caught doing certain things underage. This can also make it hard once a person gets older and try to obtain certain credentials these types of things may come back as an issue. For example, making an utility account underage can be a issue later on down the line.
