

Review the articles linked with each individual motive in the presentation page or Slide #4. Rank the motives from 1 to 7 as the motives that you think make the most sense (being 1) to the least sense (being 7). Explain why you rank each motive the way you rank it.

The first motive is multiple reasons. I ranked this one at the top because most crimes are usually linked to multiple reasons. Someone who is trying to get revenge may also find it entertaining. Someone may also seek recognition after gaining financial gain. At number two, I would say for money. Everyone in society is seeking to gain more money. When it comes to running into financial problems, it may cause people to commit crimes to make up for their loss. Number three is revenge. This is a very common motive as most people are treated in a wrong manner and this causes them to commit a crime to get back at someone. Number four is recognition. Some people will commit a crime because they want acknowledgement for what they did this could be good or bad situations. Number five I would say politics. When it comes to some type of attack, its usually based off making a political statement. Number six is entertainment. I believe this motive is less likely because when an attack occurs, there is a reason not just for entertainment purposes. I rank boredom last because most of the time when a crime is committed there is a reason for it and the person is trying to gain something. They are not committing the crime just to pass time.
