Bristow, VA | Stephencobbbb@gmail.com | 571-340-0083 (Cell)

EDUCATION

Old Dominion University

Norfolk, VA

Bachelor of Science, Cybersecurity | Current GPA: 3.4

Expected Graduation: May 2025

Relevant Coursework:

- **Network & OS Security:** Hands-on experience in securing networks and operating systems, including network mapping, firewall management, and vulnerability scanning with Nmap and Wireshark.
- **Cyber Threat Hunting & Incident Response:** Trained in threat detection, analysis, and response, including hunt operations, system evaluations, and penetration testing.
- **Cloud & Application Security:** Studied cloud security and application-layer protocols, focusing on encryption (PKI) and vulnerability monitoring.

WORK EXPERIENCE

Data Analytic Solutions

Arlington, VA

Intern

May 2024 – August 2024

- Performed system evaluations and analyzed data to support external companies in identifying specific security requirements for their network and operating systems.
- Utilized government platforms (GSA eBuy, SAM.gov) to research and monitor cybersecurity-related opportunities, including updates on security tools and vulnerability management RFQs.
- Authored security-focused proposals for government contracts, contributing to the development of strategies around system security, penetration testing, and cybersecurity operations.

Prince William Golf Course

Nokesville, VA

Cart Staff / Pro Shop Worker / Grill Master / Camp Counselor

May 2020 - July 2022

- Answered questions and provided information about course rules and regulations.
- Welcomed golfers and aided with loading/unloading equipment onto carts.
- Supervised camper activities, fostering fun, safety, and structure while introducing golf education.

SKILLS & INTERESTS

- **Linux Command Line:** Proficient in using Linux command line for system management, automation, and security configurations.
- **Windows Server OS Security:** Experienced in the installation, configuration, and management of Windows Server OS, with a strong focus on securing systems and maintaining operational integrity.
- **System Hardening:** Skilled in applying security best practices to harden both Linux and Windows server environments, ensuring robust defense against vulnerabilities.

Certifications

- **Certifications are in progress:** CompTIA Security+ and AWS Certified Cloud practitioner.

Clearance

- **Clearance in progress:** TS/SCI Poly
