

Think about how the description of the cybersecurity analyst job relates to social behaviors. Write a paragraph describing social themes that arise in the presentation.

<https://www.youtube.com/watch?v=iYtmuHbhmS0>

In the video she was talking about what a cyber security analyst is and the duties/responsibilities, salary, and how you get started. As she stated, a cyber security analyst is usually the first line of defense. In terms of social behavior, it would be helpful for an analyst to think like a hacker to see any vulnerabilities. An education is needed forehand to make sure you have the basic knowledge down pact. An open line of communication is needed as you may be working in a team, so you must communicate with your coworkers.
