

Certain areas I would like to focus on in my career consist of: Executive Cybersecurity Leadership, and Cybersecurity Legal Advice. As for Executive Cybersecurity Leadership, leadership and coordination is what strikes my interest because executives oversee and motivate cybersecurity teams, cultivating a security-aware culture and guaranteeing that their staff members are highly skilled and driven. They are in charge of attracting and keeping talented cybersecurity professionals. Secondly, Cybersecurity Legal Advice is important because it guarantees that businesses stay within the law, manage risks efficiently, and react to incidents responsibly, and cybersecurity legal guidance is essential and I would execute in that area.
