Introduction

While in the Cybersecurity degree program as well as the interdisciplinary courses, I have learned many skills. My three most marketable skills that I will be going more in depth about are troubleshooting, organization/planning, and leadership. Many of the artifacts used to demonstrate these skills are gathered from my work experience while at Old Dominion University.

Leadership

While I have always felt that I was good at troubleshooting, I have seen significant growth while at ODU. I especially felt this way after work at the ODU IT Help Desk.
